**YANMAR
EF 514T**

HL 1800

HL SERIES has optimized design and is made of special materials to display **Excellent Functionality** under any working condition.

**THE
ULTIMATE
LOADER FOR
SAFETY OPERATION**

Special Features

- **Control Valve**

The control valve improves the operation of the boom and bucket by changing the direction of the hydraulic oil.

- **Dual Mounting/Dismounting Device**

Anyone can easily mount or dismount the loader with a simple one-touch lever pin.

- **Hydraulic Pipe**

Experience enhanced durability with the hydraulic pipes manufactured by **BENTELER** (Made in Germany) and applied to all models.

- **Special Steel Bucket**

Designed to load objects safely even after long hours of operation. Special Steel Bucket with abrasion resistant claws has excellent excavation strength.

- **Convenient Automatic Implement Locking**

Connect the bucket and loader then release the lever. It will be tightly locked up for safe work.
